PROFESSIONAL SUMMARY

AI Engineer with a BSc in Information Technology and current experience within the Data & Analytics division of First National Bank (FNB). Skilled in SQL, Python, Excel, Power BI, data warehousing, ETL processes, data transformation, and reporting automation. Experienced in extracting, cleaning, validating, and analysing large datasets to support reporting, business decision-making, and operational efficiency.

Strong understanding of financial reporting principles, data reconciliation, audit support, KPI reporting, portfolio analytics, data quality monitoring, and stakeholder engagement. Proven ability to develop automated reporting solutions, investigate data discrepancies, document processes, and collaborate across business and technical teams to deliver accurate, auditable, and data-driven insights. Passionate about leveraging analytics, reporting, and financial data to support business growth, financial performance, and strategic decision-making.

KEY SKILLS

Professional & Interpersonal	Technical
- Stakeholder Engagement - Problem Solving - Process Improvement - Documentation - Attention to Detail - Communication - Team Collaboration - Continuous Learning	- Python (Pandas) - SQL - Power BI(Visualization) - Microsoft Excel - Ab Initio ETL - Metadata Hub - Statistical Analysis - Git Version Control - Weaviate Database - Artificial Intelligence & LLMs
Analytical - Quantitative Analysis - Data Analytics - Data Interpretation - Statistical Analysis - Data Monitoring - Data Transformation, Validation, Quality - Reporting & Dashboard Development - Business Analytics - Trend Analysis	

RELEVANT PROFESSIONAL EXPERIENCE

AI Engineering Learner — Data & Analytics Business Unit First National Bank (FNB)	June 2025 – Present
Extract, transform, validate, and analyse large datasets using SQL and Python to support reporting, business analysis, and data-driven decision-making.	

- Develop and maintain reporting solutions and data pipelines that improve reporting efficiency, accuracy, and accessibility.
- Perform data quality assessments, reconciliation activities, and validation checks to ensure integrity and consistency across multiple data sources.
- Create analytical reports, dashboards, and KPI reporting solutions using Power BI and Excel for business stakeholders.
- Collaborate with business, analytics, and technical teams to gather requirements and deliver reporting solutions aligned to organisational objectives.
- Investigate data discrepancies and support root cause analysis to improve data quality and reporting accuracy.
- Produce documentation for data processes, business logic, workflows, and reporting methodologies to support governance and audit readiness.
- Support portfolio and performance reporting by analysing customer, operational, and transactional datasets.
- Automate repetitive reporting and analytical tasks using SQL and Python to improve efficiency and reduce manual effort.
- Contribute to continuous improvement initiatives through enhanced reporting, data governance practices, and process optimisation.

Casual Labour — Department of Education

2018 (10-Month Contract)

University of Witwatersrand

- Accurately captured and processed approximately 150 Excel-based student records daily from content forms and mark sheets, demonstrating strong attention to detail, time management and data integrity under consistent deadline pressure.

PROFESSIONAL EDUCATION

BSc Information Technology *North-West*

University **Data Science & Analytics, NQF**

Level 5 (2025)

Geeks4Learning

National Senior Certificate (2017)

Minerva High School

LEADERSHIP EXPERIENCE

- Deputy Chairperson, Excellence Book Club (2021 – 2022) — led team initiatives and fostered a collaborative, engaged community.
- Treasurer, Backlash Information Technology (2019 – 2020) — managed financial reporting and accountability for a student run organisation.
